DIGESTS **PROTEIN** → **AMINO ACID**

AMYLASE

DIGESTS **CARBOHYDRATES** → **FATTY ACID**

- Restores digestive enzyme activity
- Improves absorption of nutrients & fat-soluble vitamins (A, D, E, K)
- Reduces bloating, abdominal discomfort, and steatorrhea
- Enhances appetite and nutritional status
- Promotes better digestive comfort in EPI patients

Dose : 1 Cap with each meal

After pancreatic surgery, up to 80% of patients may develop exocrine insufficiency

Exocrine Pancreatic Insufficiency

Diarrhea	Steatorrhea
Malabsorption of lipid-soluble vitamins	Abdominal Distension
Deficiency of vitamin B12	Weight Loss
Exacerbate motility disorders	Oedema
Chronic pancreatitis	Pancreatic carcinoma
Post-pancreatectomy conditions	Steatorrhea & mal-absorption syndromes
