

An Innovation Beyond PPIs

VONORICHTM-20

Tablets

Vonoprazan 20 mg

- Binds with Potassium to prevent $H^+K^+ATPase$ enzyme activity, P-CAB (Potassium competitive Acid Blocker)
- P-CAB is competitive while PPI are irreversible
- Faster, Potent & Consistent inhibition of acid than PPI
- Lesser chances of Ulcer Rebleeding (7.1% vs 10.4%)

Helicobacter pylori eradication rates
Vonoprazan=96.7% in 7 days
Omeprazole=88.5% in 14 days

Journal of Gastroenterology and Hepatology 36 (2021) 3308–3313

95.4% Ulcer healing rates at 4-8 weeks

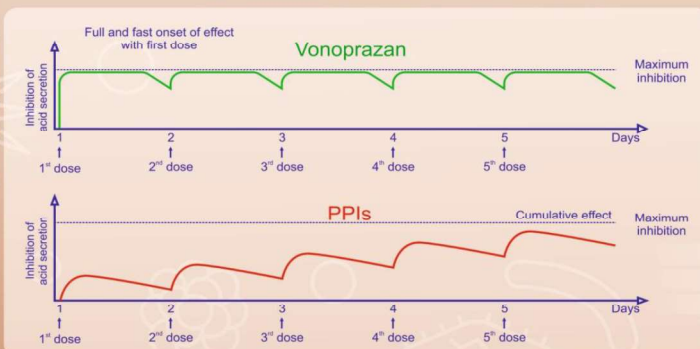

- Reflux Esophagitis
- Gastric Ulcer
- Duodenal Ulcer

Fast Onset.
Long Duration.
Strong Control.

Dose : One tab. OD
 for 30-60 days

Time course of acid inhibition by Vonoprazan and PPIs
